Dr. Copeland said in reference to the Public Health Exposition: "The time is here when expositions are an effective medium of teaching public health. This is our first health exposition but not cur last, I hope. New York has the reputation of being the healthiest city in the world. At Grand Central Palace we will assemble the operators, equipment and machinery used in the prometion of public health and welfare. We are and machinery used in the prometion of public health and welfare. We are not satisfied with the present high standard of health. We want to raise our health standards. We want to stimulate interest in better health, in a healthier city, in a happier and longer life than the three score and ten promised by the Bible. We want to realize that healthy bables make for healthy children, and hea

"China with her floods is an example to the world of the need of reforestation," he says. "A conservative expenditure for various forestry enterprises, mainly nursery work and forest planting, is from \$200,000 to a quarter million dollars, the production of 100,000,000 trees in over 1,000 nurseries, and the planting of 25,000,000 to 30,000,000 trees on 100,000 acres of land. This may seem small when compared with some other countries, but large when one considers the background and the fact that China's interest in forestry is only a few years old."

"The magnitude of the devastation in the Anhwei province," says Charles Lathrop Pack, president of the association, in giving out the report of Dean Reisner, "may be seen when we consider that the flooded area is twice the area of Massachusetts, or about 15,000 square miles.

received, according to an announcement made at the headquarters of the chapter, 598 Madison avenue. Nine replies were received to inquiries sent through the foreign information bureau of the chapter for foreigners in this city attempting to locate friends and relatives in Russia. The replies came from Moscow through Bern, Switzerland, by the agency of the Russian Red Cross. In locating these lost families an address bureau established under the Government of the Czar was used.

In its analysis of work done in the fiscal year just ended the foreign information bureau of the New York County Chapter, Red Cross, reports that 11,668 foreigners in New York city received help and advice. Their needs ranged from geographical questions to be answered to tracing prisoners of war and relatives abroad, information on how to bring relatives from Europe, forwarding mail and parcels to Europe, inquiries regarding money and exchange, writing letters in foreign languages and copying discharge papers.

A linguist who has nine languages and thirteen dialects at his command is constantly on hand at the bureau. The New York County Chapter opens its 1922 roll call on Armistice Day, when 500,000 New Yorkers will be asked to take out their dollar memberships to carry on the work of the Red Cross through the coming year.

GERMANS PLAN CANAL TO OPEN NEW FIELDS

Will Shorten Route to Industrial Area.

Special Correspondence to The New York
Humald.
Berlin, Oct. 5.—As part of the programme for the more intensive exploitation of German waterways it is proposed to construct a canal between the
Ems and the Weser, using the existing
streams as far as available. This will
make it possible for large ships to reach
the Rheighish-Westphalian industrial district from the Baltic ports. Most of the
way is already open, and it will only be
necessary to construct a stretch from
Dorpen, on the Ems, to Kampe, on the
Hunte, at a cost of some \$92,000,000
marks.

Hunte, at a cost of some \$92,000,000 marks.

This would shorten the route to the industrial area by about 103 kilometers and make possible a reduction in the tidewater price of coal, and would at the same time open up great turf fields to a profitable market. Large areas now unprofitable for farming could then be brought under cultivation for potatoes or used for cattle pasturage. The increased potato yield, it is estimated, would be enough to support more than 3,000,000 people, besides furnishing a good seed crop.
